Health Products

The quality of the ENADA - NADH product is controlled by analysing the NADH content of every single production lot by the producing company Merck (Darmstadt, Germany), by the quality assurance department of Birkmayer Laboratories and by a 3rd independent European or US analytical laboratory.

A certificate of analysis is provided for every production lot and any shipment.

Dear Georg:

Given your recent expressed concerns regarding "possible micro biological contamination" of ENADAlert packets enclosed is the test results of two lots as follows:

MC33301 Manufactured by Merck in November, 2000 and pouched by Highland Packaging, Inc.

MC34601 Manufactured by Merck in December, 2000 and pouched by AcuPac Packaging Inc.

American Analytical Chemistry Laboratories Corp. did the HPLC and Microbe testing. The results show excellent stability of NADH content with no detected micro problems using FDA approved food grade measurement standards.

Best regards,

cc: Matt
